

Paper Title: Improving Inverter-based Resource Resilience: Neural Network Control for Virtual Synchronous Generator Damping

Paper ID: **127**

**Author/Presenter:** Lydia Asare Bediako, PhD Electrical and Computer Engineering, Lehigh University, Bethlehem, PA, U.S.

**Bio:** Lydia Asare Bediako is a PhD student in the Electrical and Computer Engineering Department at Lehigh University, specializing in power systems. She earned her bachelor's degree in electrical engineering from Kwame Nkrumah University of Science and Technology (KNUST), Ghana, in 2022. Her current research focuses on Control for Enhanced Microgrid Operation and Resilience.
