Orhun Celil ÖZEN was born in Rize in 1999. During his studies in electrical and electronic engineering at the university, he completed a 3-month internship in the electricity distribution sector. He also served as a research fellow in the field of artificial intelligence for 9 months. After completing his university education, he started working in the field of building automation systems and continues to work in this field. During this period of work, he graduated from Marmara University's master's program in financial economics in 2023. Subsequently, he started the master's program in electrical and electronic engineering at Marmara University in 2024 and is still continuing his master's studies. His research interests include building automation systems, energy efficiency, energy storage techniques, lighting systems, and economic analysis methods.

Onur AKAR
Department of Electronic and Automation
Marmara University
Istanbul, Türkiye
