

Armando Taveras Cruz holds a bachelor's degree in electronics and communications engineering from Instituto Tecnológico de Santo Domingo and has a master's degree in Renewable Energy from EOI University, Spain. Currently, he is a PhD candidate in a joint/dual doctorate for Energy Management and Renewable Energy programs at the Instituto Tecnológico de Santo Domingo in the Dominican Republic and the University of Jaén in Spain. Armando is also an engineering instructor at the Instituto Tecnológico de Santo Domingo and an IEEE Member. His research topic is based on implementing adaptive electrical protection techniques for microgrids.
