Title : Improving the performance of a non-uniform field system under AC voltage

Talit Belhoul was born in Akbou (Bejaia), Algeria. She obtained her D. E. U.A from the University of A.Mira, Bejaia, in 2006. In 2009, she obtained a degree in electrical engineering from the University of A.Mira, Bejaia. In 2012, she received her Magister degree in power systems from the University of Bejaia, Algeria. In June 2019, she obtained her doctorate in science, in High Voltage Engineering. In the same year, she was recruited as a research professor in the electrical engineering department at the same university. She received her MCA degree in June 2023 (authorization to direct research). She is member of laboratory "LGEBejaia". Her main researches interest the effects of pollution and dielectric barriers. She has co-authored over 25 papers.
